PROJECTS

Personal Project

Jan '23 - May '23

Hospital Management System

Developed a dynamic Hospital Management System using HTML, CSS, JavaScript, Bootstrap, PHP, and MySQL. This comprehensive system includes three-tier logins for Patients, Doctors, and Admin, streamlining healthcare processes.

Key Features:

- User-friendly interfaces for Patients, Doctors, and Admin.
- Patient portal for appointment booking, viewing appointments, and accessing medical records.
- Doctor dashboard for managing schedules and updating patient records.
- Admin control panel for overall system management.
- Appointment booking system with automated confirmations.
- Robust MySQL database for secure data storage and retrieval.
- Responsive web design with dynamic features using JavaScript.
